

REECE ARMES

PORTFOLIO WEBSITE

DESIGN PROCESS

- ▶ Gathered ideas with a mood board.
- ▶ Created a colour pallet based on images from mood board.
- ▶ Tested different fonts.
- ▶ Mocked up and created Logo.
- ▶ Create Wireframe of layout and grid.

COMPLICATIONS

- ▶ Too ambitious for the time constraints and skill level.
- ▶ Some additions to my website would have needed Javascript (which was out of the scope).
- ▶ Getting the grid layout perfect.
- ▶ Media queries completely changing the layout for different devices.

FAVOURITE PARTS

- ▶ The overall project was fun, I will definitely create an updated website once my skills are more refined with animations and javascript.
- ▶ Mocking up the webpage.
- ▶ If I had time the animation would have been awesome to implement. Tried a few out on codepen which would have been cool to add.
